

Dylan Smith Reading #4

1. `factorial()` calculates the factorial of a number.
2. `choose()` calculates a combination.
3. `set.seed(25)`
`sample(c("Heads", "Tails"), 6, replace = TRUE, prob = c(0.3, 0.7))`
4. Use the letter `d` first when calculating $P(X=x)$.
5. Use the letter `p` first for $P(X \leq x)$ and $P(X > x)$.
6. `set.seed(60)`
`rbinom(32, 18, 0.62)`
7. a) `dpois(0, 6.1)`
b) `1 - dpois(0, 6.1)`
c) `ppois(12, 18.3)`
8. a) `1 - pt(1.81, 14)`
b) `qt(0.03, 14)`
